Computer Engineering Technology student at Politeknik Negeri Semarang with a 3.81/4.00 GPA. Specialized in UI/UX Design and digital product development, with a proven track record of designing intuitive web and mobile interfaces using user-centered design principles. Experienced in leading digital product projects, cross-functional collaboration, and organizational management. Driven to deliver user-oriented design solutions that create a meaningful business impact.

PROJECT EXPERIENCE

WICARA – Campus Complaint, Lost Item Report & Academic Service Rating System
UI/UX Designer | Project-Based Learning, Polines | 2024

- Designed information architecture, user flows, and navigation structures for the WICARA web application (Admin Panel) and mobile application.
- Created low-fidelity wireframes to interactive high-fidelity prototypes in Figma for features including complaints, lost and found reporting, and campus academic service ratings.
- Applied user-centered design principles to ensure intuitive, user-friendly interfaces with clear visual hierarchy tailored for students and administrators.
- Collaborated closely with developers to build a UI component system (design system), ensuring a seamless and efficient design-to-code handoff.

Tools & Design Stack: Figma, UI/UX Design, User Flow, Information Architecture, & Design System

GUDANGKU – Warehouse Management System
UI/UX Designer | Project-Based Learning, Polines | 2025

- Designed information architecture and a web-based dashboard interface to streamline real-time monitoring, tracking, and warehouse inventory management.
- Mapped out user flows and wireframe layouts focused on navigational efficiency for inventory data management, minimizing operational data entry complexity.
- Developed high-fidelity UI designs and a consistent design system in Figma, ensuring table elements, status cards, and data filters are clear and user-friendly.
- Collaborated with the team to align warehouse system workflows with a clean, functional, and intuitive layout.

Tools & Design Stack: igma, UI/UX Design, Information Architecture, Wireframing, & Design System

TaniKita – Mobile App UI/UX Design for Farmer Empowerment
UI/UX Designer | UI/UX Design Competition HIMI UNSURYA | February 2025

- Conceptualized and designed the TaniKita mobile app interface using user-centered design principles to improve supply chain efficiency and daily farming operations.
- Conducted problem framing, developed user personas, and mapped user flows tailored to the specific needs and digital literacy levels of the target users.
- Developed intuitive, user-friendly, and aesthetically pleasing high-fidelity UI designs, along with interactive Figma prototypes to simulate core features.
- Delivered rapid prototyping solutions within tight competition deadlines, spanning from initial ideation to final visual asset creation.

Tools & Design Stack: Figma, UI/UX Design, User Research, Wireframing, & User Flow

WORK & INTERNSHIP EXPERIENCE

Warehouse Operations Intern – PT. Telkom Akses Semarang
June 2022 – December 2022

- Performed Quality Control (QC) and physical condition verification on incoming inventory and materials to ensure full compliance with operational standards and specifications.
- Meticulously managed, updated, and organized logistics inventory data to maintain high stock accuracy across warehouse operations.
- Analyzed and categorized inbound and outbound material flows to enhance processing efficiency and streamline supply chain management.
- Collaborated with the logistics team to complete inventory evaluations and ensure property governance adhered to Standard Operating Procedures (SOP).

Graphic Designer – PT. Jagat Media Teknologi
June 2023 – August 2023

- Designed visual content and digital promotional assets aligned with the company's brand identity to drive user engagement.
- Applied visual hierarchy, layout principles, and strong typography as core foundations for impactful visual communication designs.
- Partnered with cross-functional internal teams to translate business goals and media requirements into informative and aesthetic visual assets.
- Managed graphic asset production efficiently under tight project deadlines prior to commencing university studies.

EDUCATION

Politeknik Negeri Semarang | Bachelor of Applied Science in Computer Engineering Technology
GPA: 3.81 / 4.00 | Semarang | 2023 – Present

ORGANIZATION

Polytechnic Computer Club | Research & Development
Semarang | 2025 - 2026

- Supervised and evaluated executive board operations to ensure all work programs aligned with the organization's vision and strategic goals.
- Provided strategic guidance, critical analysis, and actionable recommendations regarding the execution of organizational work programs within UKM PCC.
- Coordinated and monitored division performance as appointed by the executive board to maintain high standards of operational quality.
- Formed and led collaborative project teams with the Workshop Division to plan and execute IT events and initiatives.
- Project Manager / Chairman of Techcomfest 2026: Spearheaded a national-level IT competition for high school and university students, managing committee workflows and ensuring end-to-end event execution.

Polytechnic Computer Club **| Multimedia Department Staff**

Semarang | 2024 - 2025

- Designed and produced diverse visual assets, graphic elements, and multimedia portfolios to support organizational branding and work programs.
- Facilitated workshops and sharing sessions on multimedia and design for internal members as well as external university audiences.
- Upskilled UKM PCC members and board members in technical hard skills related to graphic design and visual media.
- Managed and curated multimedia blog content in collaboration with the Workshop Division to boost the organization's digital reach and publication presence.
- Provided technical support, strategic recommendations, and design execution for multimedia requirements across all active work programs.

SKILLS

- UI/UX Design & Methodology: UI/UX Design, User Research, Wireframing, Interactive Prototyping, Information Architecture, User Flow, Design Systems, Usability Testing, Visual Hierarchy.
- Additional Skills (Design & Technical): Graphic Design, Video Editing, Layouting, Front-End Basics (HTML, CSS, PHP, Laravel, Flutter).
- Software & Tools: Figma, Canva, CapCut, OBS Studio, Git & GitHub, Google Workspace, Notion.
- Soft Skills: Leadership, Team Management, Event Planning, Problem Solving, Analytical Thinking, Critical Thinking, Attention to Detail, Communication.
- Languages: Indonesian (Native), English (Professional Working Proficiency).
